**Subject:** TANDLAW MOSS LOCAL BIODIVERSITY SITE

CAUTION: External Email

Good Morning [REDACTED]

[REDACTED] has passed us your letter of 29 October 2021 as we became owners of [REDACTED] and the [REDACTED] in September 2016.

The only comment we have on the proposal is to question the inclusion of the areas coloured green on the plan adjacent to [REDACTED]. They are in fact an extension of our garden containing non-native flowers, non-native trees and shrubs, specimen rhododendrons as well as mature Scots pine trees and some other native trees. As such they do not fit the habitats set out in the proposal and we would ask that the boundary be amended to follow the moss proper.

As you will see we have copied this e-mail to the consultation address.

Yours sincerely

Roger and Ann Herbert
