Subject: Site EGL43 Objection

CAUTION: External Email

To whom it may concern

I am writing in relation to the proposed plan for site code: EGL43.

As a resident who will be greatly affected by this, it comes with great distress that I will lose a lot of light into my home if this development is built uphill behind my house. I also have huge reservations about the additional traffic this will cause in Balmoral Avenue, with the parking already very limited, this will take away spaces for the entrance proposed, and not only that, it will have a huge effect on the local policies as a lot of trees will need to be cut down to allow for the road. There are many protected trees here and a quiet and tranquil environment for many Balmoral and Gala residents to enjoy on a daily basis, which would all be lost.

I encourage all these posts to be looked at in full detail before any further decision is made.

Many thanks
Alice Mackay
