[REDACTED]

CAUTION: External Email

Dear Sir/Madam,

Please find attached, the representation we have prepared relating to our client's land in Dolphinton.

The site is referenced in the evidence base supporting the LDP as "ADOLP004".

We would be grateful for confirmation of receipt.

Thank you.

Kind regards,

Ruaraidh

22 January 2021

Dear Sir/Madam,

**REPRESENTATIONS TO LOCAL DEVELOPMENT PLAN 2 (PERIOD 2021-2026) –
PROPOSED PLAN CONSULTATION**

Introduction

Ferguson Planning has been instructed by [REDACTED] to prepare a representation to the consultation currently being conducted by Scottish Borders Council upon the Proposed Local Development Plan (PLDP2).

[REDACTED] interest relates primarily to his land in the north of Dolphinton, which is identified on the appended Location Plan. The site is known to the Planning Authority as “ADOLP004 Land to the north of Dolphinton”. The site has capacity for 10 no. new dwellings for which a conceptual layout has been prepared. It is noted that the site has not been allocated for housing development within the Proposed Local Development Plan despite promoting the site within the Call for Sites Consultation in August 2017.

Site Details

The site lies adjacent to the north of existing and approved dwellings which lie inside the Development Boundary defined for the part of Dolphinton which sits in the Borders. The Planning and Building Standards Committee determined to grant Planning Permission in Principle 20/01382/PPP on ADOLP003 which shares most of the south boundary of ADOLP004 at their meeting on 11th January 2021. The site extends to approximately 1.3ha and is a pleasant glebe. The site sits adjacent to the Development Boundary and is considered to benefit from close proximity to existing utilities infrastructure.

Vehicle access to both ADOLP003 & ADOLP004 is to be obtained from a double track minor public road sitting approximately 140 metres south of ADOLP004. The minor

public road provides connectivity between the small communities of Black Mount (most of which lie in South Lanarkshire) to the west and terminates into the A702 approximately 30 metres east of the access to the [REDACTED] two sites.

Dolphinton is located approximately 3.5 miles south-west of West Linton and 7.5 miles north-east of Biggar. All three settlements identified experience high demand for new housing, partly attributable to the ease of commuting to Glasgow and especially Edinburgh.

Both private car and public transport provide commuting opportunities to Edinburgh. The Stagecoach 101 & 102 services (Edinburgh-Dumfries principal link) provide morning and evening rush hour connections. Bus travel time to Edinburgh is approximately one hour. Travel time by car is approximately 25 minutes to the Edinburgh Bypass and a further 20 minutes into the city centre.

Opportunity

The site was excluded from the proposed allocations. The published assessment has been copied below:

Conclusions

The site is located within Dolphinton and was submitted as part of the 'Call for Sites' process. It should be noted that the site was also submitted and considered as part of the Housing SG and ultimately not included. An initial Stage 1 RAG assessment was undertaken as part of the Housing SG. At that stage, it was concluded that, a recent allocation was made within the LDP for Dolphinton, therefore that was considered to be sufficient for the LDP period.

The site itself includes derelict ground including the remains of the former railway platform and sections of old railroad in parts. The site is considered to be acceptable for housing and there are no insurmountable planning issues, which cannot be resolved through mitigation. Dolphinton has limited access to services, public transport and employment opportunities. The nearby settlement of West Linton has a school and shops. Further to the site assessment, the following constraints/mitigation were identified/proposed:

- The site is adjacent to the SSSI and within the SLA 'Pentland Hills';
- Potential flood risk and surface water hazard;
- Protection of boundary trees and retention of woodland along the A702 site boundary, where possible;
- Mitigation for protected species, including breeding birds;
- Potential archaeology within the site, evaluation/mitigation would be required;
- Maintain and enhance the pedestrian and cycle access established by LDP1 allocation (ADOLP003);
- New planting to the north and enhancement of the woodland along the eastern boundary will be required. Landscape buffers will be required and the long term maintenance of the landscaped areas must be addressed;
- A pedestrian link will be required to the existing public transport provision on the A702, either via this site or the adjacent allocation (ADOLP003);
- Co-location issues, as 'A PPC part B cement batcher' is currently located south west of the development at 'Heywood'. The likely issues are dust;

- The Roads Planning Officer has advised no objections and that access is acceptable via the existing housing allocation (ADOLP003) to the south; and
- Early discussions with Scottish Water, to ascertain whether a Water Impact Assessment will be required. However, taking the above into consideration, it is noted that as a small settlement with an existing housing allocation for 5 units that has not yet seen development, it is not appropriate at this time to allocate an additional site. It is therefore recommended that this site is not allocated within the Proposed Local Development Plan. Nevertheless, it is acknowledged that the site could be considered again for inclusion in a future LDP.

It is noted that the assessment concludes that:

“The site itself includes derelict ground including the remains of the former railway platform and sections of old railroad in parts. The site is considered to be acceptable for housing and there are no insurmountable planning issues, which cannot be resolved through mitigation.”

It is considered that this assessment, prepared by the Planning Authority, is factually correct and well founded. It is agreed that strategic development of 10 no. new dwellings is acceptable in planning terms. Development of new housing on-site would provide much needed high quality new homes in a sustainable location, within easy walking distance of a bus stop served with a regular and reliable service to Edinburgh. Delivery of new homes on-site would help to meet high demand in this attractive and accessible part of the Borders.

It should be noted that the site does not lie in an area at risk of flooding, as illustrated on the publicly viewable map kept by SEPA. Furthermore, the small industrial facility at Heywood is not a “PPC part B cement batcher”. It stores and delivers dry goods for input into the cement making process. Materials are transitioned onward from Heywood in third party HGV’s for mixing on construction sites. Incidentally ADOLP004 sits further from the industrial facility than all existing dwellings and ADOLP003.

The south boundary of the site would be shared with the rest of Dolphinton while the east boundary would be enclosed by the A702. The west boundary is very short and already partly defined by established trees. The north boundary could be more distinctly defined by new tree and hedge planting to create a distinct landscape feature enclosing the developed area of Dolphinton. This would represent a preferable set of circumstances in which ADOLP003 sits contiguous with the surrounding countryside.

The case for the allocation of ADOLP004 is considered to be supported by the shortfall in Housing Land Supply set out in Appendix 2. Allocation and development of the site can assist in delivering new homes and ensuring an effective supply of land for housing is maintained in the Borders, per the responsibility of the Planning Authority.

It is noted that ADOLP004 was omitted as a proposed housing allocation from the

adopted LDP on the eve of submission. An extract from the LDP’s evidence base was provided to Mr Wilson in explanation and has been copied below.

ADOLP004 – Land to the North of Dolphinton

X Extract from Appendix B – MIR Consultation Responses X

Dolphinton	ADOLP004 Land to the North of Dolphinton	The contributor supports the inclusion of ADOLP004 as a Preferred Option and states that they would be delighted to respond and address any comments which arise through the MIR consultation. The contributor states that only 10 units on the site as they may be for people who wish to work from home or would wish to have a downstairs bedroom. (1 (2 and 3 of 3))	Comments and support noted. However, in light of the consultation responses received during the Main Issues Report public consultation, and as a result of further consideration on the matter, it is proposed that this site ADOLP004 will not be taken forward into the Proposed Local Development Plan (LDP) as a housing site. It is noted that as a small settlement with an existing housing allocation for 5 units that has not yet seen development, it is not appropriate at this time to allocate an additional site. It is therefore recommended that this site is not allocated within the Proposed Local Development Plan. Nevertheless, it is acknowledged that the site could be considered again for inclusion in a future LDP. As a result of the above, it is considered inappropriate to identify site ADOLP004 within the Proposed LDP.	It is recommended that the Council agree not to allocate this site within the Proposed Local Development Plan.
------------	---	--	--	--

The extract refers to “consultations responses received during the Main Issues Report public consultation”. Despite the passage of time, our client remains confused and disappointed that ADOLP004 was excluded from the sites proposed for allocation – against the advice of the Planning Authority’s officers and consultees on the basis of the objections of members of the public. As of January 2021, our client has not been provided with copies of these comments or been given the opportunity of reply.

It is also material that our client is actively preparing construction of new dwellings on ADOLP003. This process involves securing delivery of both public water supply and electricity network to the site. While it is noted that the Planning Authority are mindful of the benefits of phasing development; [REDACTED] plans to comprehensively integrate development of both ADOLP003 and ADOLP004 using a single access and stem through which utility supply will be delivered.

Specifically, [REDACTED] is currently making arrangements for supply of the high pressure water mains and electricity cables on the boundary of his ownership to be delivered into ADOLP003, creating an opportunity to service ADOLP004 simultaneously.

Provision of a 50KW charger to serve electric car batteries is intended for each new dwelling. However, it is not possible to install the supply for ADOLP004 without planning permission as SP Energy Network maintain a policy of refusing to engage before consent is granted.

The ability to bring forward development of both sites holistically will result in greater commercial certainty to build new dwellings, lower construction costs, and future occupants accepting less disruption and construction nuisance. In short, each of these benefits will directly contribute to better deliverability of housing on-site.

Conclusion

We consider that the site should be allocated for 10 no. new dwelling in Local Development Plan 2. There are no natural or pre-existing constraints to on-site development and housing could be delivered within the LDP period, if allocated.

The site is located in a sustainable location. It is within walking distance of a bus stop that provides regular and reliable bus services to Edinburgh, West Linton, and Biggar.

The site is considered to be well related to Dolphinton, which lies in a part of the Borders where new housing is in high demand. The site is bounded by distinct landscape features on all but one side and a sensitive scheme of native tree and hedge planting can attractively enclose that boundary.

The site is considered to be well related to Dolphinton and present a suitable opportunity for delivering sustainable development and helping to ensure that an adequate Supply of Housing Land is maintained. It is respectfully requested that the site is allocated for housing development.

It is considered that sufficient information has been included to enable the Planning Authority to allocate the site. If you require anything further then please do not hesitate to contact Ruairaidh Thompson or Tim Ferguson.

Yours Sincerely

Ferguson Planning

APPENDIX 2

Analysis of Housing Land Supply in the Scottish Borders 2009-2026.

Description		Figure	Calculation
Scottish Borders Housing Land Requirement (2009-2024) ¹	(a)	12,930	
Length of period (years)	(b)	15	
Annual housing requirement	(c)	862	(a)/(b)
Annual housing requirement (2009-2019) ²	(d)	965	9,650/10
All tenure completion 2009-2019 ³	(e)	3,959	
Completed years	(f)	10	
Remaining residential requirement	(g)	8,971	(a)-(e)
Years remaining ⁴	(h)	5	
Revised Annual housing requirement	(i)	1,794	(g)/(h)
5 year requirement	(j)	8,971	(i) x 5
SBC-claimed effective supply	(k)	3,679	
Audited effective supply ⁵	(l)	2,351	
SBC-claimed number of years supply	(m)	0.41	(k)/(j)
Audited number of years supply	(n)	0.26	(l)/(j)
Audited housing shortfall	(o)	6,620	(j)-(l)

Policy 5 of SESPlan 2013 establishes the housing supply targets for the Edinburgh and South East Scotland City Region. The supporting information and supplementary guidance to the Policy establish supply targets for each local authority area, including the Borders.

Over the period 2009-19, 9,650 new dwellings should have been completed in the Borders. However, the number of units delivered during that period totals 3,959. While it is accepted that excluding sites which the Planning Authority has pursued development of, from the suite of sites proposed for housing allocation would be counterproductive; it is clear that more needs to be done to maintain an effective supply of land for housing and deliver new homes in the Borders.

Ferguson Planning have presented a suite of sites in this consultation which are well related to existing settlements, arterial transport routes, and utilities infrastructure. It is considered that sustainable development of these sites can deliver much needed new homes and assist in redressing under delivery of housing in the period 2009-19.
