Response to Local Development Plan 2 (Period 2021-2026)- Proposed Plan Consultation

Roxburghe Estates- Nethershot, Kelso (LPA ref: AKELS021 and SKELS004)

Dear Sir/ Madam,

Introduction

We write on behalf of Roxburghe Estates and in relation to the above consultation. This representation relates to this site at Angraflat, Kelso and is accompanied by a location plan (as shown in Appendix 1). We wish to support the continued allocation for 100 dwellings within the current Local Development Plan and the proposed allocation for 140 dwellings within the proposed Local Plan.

In support of the allocations, our analysis of housing demand can be found in Appendix 2 which identifies there is a high demand for housing within the Scottish Borders. Delivering new housing on-site can help to service that existing demand while maintaining the character of the surrounding area.

The subject site represents an opportunity for residential development within a desirable sustainable location, within walking distance of the local services and amenities.

Site Details

The site is approximately 10.28 hectares and is an area of agricultural land located to the North West of the town of Kelso, immediately north of the A6089 Angraflat Road/Golf Course Road. It is located to the south west of Kelso Racecourse immediately adjacent to the racecourse parking area. The site is to come forward in two phases. The first being AKELS021 which is allocated for 100 houses in the current LDP with the second being SKELS004 for 140 houses in the LDP 2021-2026. We seek both to be allocated within the 2021-2026 LDP.

Part of the site (allocation AKELS021, DKELS001 and part SKELS004) was granted planning permission (13/00427/PPP) for a mixed use development consisting of housing and a school in December 2016. This included provision for some 240 dwellings in total.

It is considered the site represents a logical extension to the settlement boundary and location for residential development.

Local Development Plan 2, Proposed Plan

The proposed LDP2 has the subject site allocated for residential development and as set out within the extract below. The section to follow will then go onto provide related context and put forward recommendations for a limited modification to the allocation.

AKELS021	Nethershot (Phase 1)	4.1	100
Site Requirements			
<ul style="list-style-type: none"> • Vehicular access to the site is to be taken from Angraflat Road • Existing hedgerows are to be retained and enhanced where possible • Structure planting required to provide setting for development and provide screening from the adjacent High School. A management scheme for planting is required • Housing development should orientate habitable rooms to the south east/ south west to maximise solar gain • Red-listed bird species on the site and further assessment of nature conservation is required • The development should limit the height of houses to two storeys • A Water Impact Assessment would be required • Pedestrian links from the site to the new adjoining High School site are required. 			

POTENTIAL LONGER TERM HOUSING SITES (SUBJECT TO REVIEW)

SITE REFERENCE	SITE NAME	SITE SIZE (HA)	INDICATIVE SITE CAPACITY
SKELS004	Nethershot (Longer Term)	6.7	TBC
Site Requirements			
<ul style="list-style-type: none"> • It is intended a Planning Brief in the form of Supplementary Planning Guidance be produced for this site along with earlier development phases at Nethershot • Existing and new woodland needs to be retained and enhanced and included in a management scheme • Structure planting required to provide setting for development and to reinforce settlement edge. A management scheme for planting is also required • Archaeological evaluation for the south western part of the site, near Angraflat Plantation, to examine if there are remains of cultivation terraces. Associated mitigation measures should be implemented • A buffer area is required for additional woodland on southern and western boundary after archaeological valuation is carried out • Woodland planting is required on the western boundary to reduce any impact on Floors Castle Designed Landscape and to reduce visual impact from the countryside • Red-listed bird species on the site and further assessment of nature conservation is required • Housing development should orientate habitable rooms to the south east/ south west to maximise solar gain • The development should limit the height of houses to two storeys • Access to the site is to be taken through the adjoining site AKELS021 • A Water Impact Assessment would be required • Pedestrian links from the site to the new adjoining High School site are required. 			

Opportunity

The site's location near the new High School, racecourse, golf course, mountain bike trails together with being within walking distance of the town centre makes it a very strong prospect for family orientated housing. The site has been marketed and Phase 1 is soon to be developed.

There are no potential constraints associated with the site and no contamination issues. The site is not at a risk of flooding. As it is within the Kelso development boundary and next to existing residential properties it is therefore in close proximity to nearby infrastructure and utilities.

The site is physically capable of development, including generally level topography and no flooding issues. There are no significant issues with regard to ground stability, contamination, groundwater, gas emissions, flood risk and services. Stage 2 site investigations will be undertaken in tandem with the detailed applications stage.

The site is within a marketable area in terms of the Borders and South-East Scotland context, given the town's attractiveness to both local and commuter residents along with its close proximity to a range of services, leisure opportunities and local employment sources.

The site would connect with existing infrastructure and utilise the existing main road with regular bus services which could be augmented. Kelso, as one of the main settlements with the Central Borders development area, has good accessibility to local services and amenities.

There is considerable constrained sites within the current and proposed LDP that requires to be addressed to ensure housing shortfalls do not materialize. Our housing audit analysis in appendix 2 provides the associated evidence. It is thus that sites like this and to which the council themselves deemed acceptable in their previous alternative site allocation comes forward.

Conclusion

We believe that the sites allocations should be continued within the Local Development Plan 2021-2026. There is a market demand for housing within Kelso and due to the unconstrained nature of the site, it is an attractive prospect to the developer.

The site is located within a sustainable location, within walking distance to the services and facilities. The site is also next to current built form and thus easy access to utilities and existing infrastructure. It is considered the site represents a logical extension to the existing settlement boundary and will help meet housing demand within the Scottish Borders.

We stress the importance of allocating housing in the Scottish Borders where there is a

FERGUSON PLANNING

strong demand to live. Due to its strategic location, there is a strong demand to live in Kelso and thus we kindly request that the site be allocated.

If you have any queries regarding the enclosed documents, please do not hesitate to contact myself [REDACTED] or my colleague [REDACTED]
