CAUTION: External Email

Dear Sir/Madam,

Please find attached, the representation we have prepared relating to our client's land at Caerlee Mill in Innerleithen.

The site is shared with that of Planning Permission 14/00638/PPP.

We would be grateful for confirmation of receipt.

Thank you.

Kind regards,

Representation to Local Development Plan 2 (Period 2021-2026)- Proposed Plan Consultation

Caerlee Mill, Innerleithen - Site Reference: MINNE001

We write on behalf of our client, Whiteburn Caerlee LLP, who you will be aware own and are at present bringing forward high quality new homes on the former Caerlee Mill site.

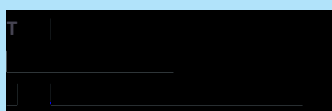

Whiteburn would like to take this opportunity to make representations to the proposed Local Development Plan 2 (LDP) and regarding the future redevelopment aspirations for the site. The background to the site is outlined below together with our recommendations / modifications to the Proposed Plan.

Site Background

The Caerlee Mill landholding is situated on Chapel Street, Innerleithen and extends to approximately 1.5 hectares. A site plan is provided within **Appendix 1**. The Mill was constructed in 1788 by Alexander Brodie and has been subsequently added to in a piecemeal fashion over the 19th and 20th century. Many of the buildings are Category B Listed but with differing degrees of significance in terms of architectural or historical merit.

The Mill was occupied by JJ & HB Cashmere Mills Limited until January 2010 when the financial cost of running such a significant textile mill and in the face of increasing global competition resulted in its closure. No related or suitable alternative use has been found since the Mills closure some ten years on.

The site is centrally located within Innerleithen and within a short walk of the Town Centre. It is ideally located to take advantage of local facilities and infrastructure and meets sustainable development principles.

Caerlee Mill Site Planning Brief

In order to provide a catalyst to the redevelopment of the Caerlee Mill site the Council proactively commissioned a number of studies and prepared a Planning Brief for the site.

The Caerlee Mill Site Planning Brief was adopted as Supplementary Planning Guidance (SPG) by the Council in August 2011. The purpose of the SPG is to act as a stimulus for development, providing guidance and a degree of assurance to any prospective new owner on the preferred way forward. In preparing the SPG Scottish Borders Council recognised that:

- the site is vacant brownfield land with no specific land allocation;
- there is generally no demand for previous uses particularly given the scale of site/buildings;
- the building is limited in terms of modern standards;
- both the building and site has problems in relation to its layout, space standards, energy use and vehicle access; and
- the Listed Building status together with the location within the Innerleithen Conservation area adds further risk and uncertainty to the redevelopment of the site.

To further assist redevelopment, the Council and the landowner obtained permission to demolish a significant number of the buildings on site.

Those works have been completed with the approved masterplan for 44 residential dwellings almost complete. The associated planning reference numbers being: 14/00638/PPP and 17/01175/FUL.

The commitment to wind and water tight works to the listed Brodies Mill and Boiler House has been committed by Whiteburn and previously to this by CWP Properties as far back as 2012.

Fast forward some eight years and, as it stands today, no end use for the buildings has been found despite considerable efforts by the landowner.

Brodies Mill and Boiler House Investigations & Marketing

Whiteburn when purchasing the site understood that, with regard to the Brodies Mill part of the overall Planning Brief and Masterplan, that the desire was to retain the listed building and associated lands for conversion and employment/commercial type uses.

That aspiration was understood as it was with the previous landowner CWP Properties. Entering into the process in good faith numerous marketing and investigations have been undertaken to find an end user that would take the associated buildings on.

Appendix 2 provides a detailed account of the attempts made and which one will see date back to 2015. Despite these best endeavours, five years on there has been no firm or realistic offer tabled to take on this part of the Masterplan.

In the meantime, maintenance costs and the like continue to increase on the landowner year on year. Again, more concerning health and safety concerns regarding the dilapidated buildings adjacent to the newly formed residential dwellings and which is impacting on the high quality built environment that is close to completion.

Whiteburn appreciate the desires for the Brodie Mill area, however, cannot continue indefinitely waiting year after year for someone to materialise to take these buildings on and which may create further safety concerns for those with children moving into the neighbouring homes.

A realistic and firm solution is needed and the flexibility to look at alternative solutions for this part of the site is needed. The most sensible being to enable or allow the buildings to be reused or demolished to enable residential homes to be created.

It is that flexibility Whiteburn now seeks within the sites allocation and associated policy wording to the overall landholding.

Housing Opportunity

The scale of housing required for the Scottish Borders has been set out by the SESPlan Strategic Development Plan which then requires to come forward and delivered by the Local Development Plan.

Sites within the Development Boundary that are sustainably located and brownfield like Caerlee should be considered superior to those that are greenfield.

The residential-led regeneration of the Caerlee Mill site would enable development within the current Development Boundary and within a short time period. We understand that there is significant housing pressure along the Tweed Valley corridor and thus an enhancement in the sites housing allocation could assist greatly in meeting that demand.

Those pressures grow year on year and across the Borders as many sites appear not to have been brought forward during the current Local Development Plan period and thus constrained. This then leading to a shortfall in housing delivery. Our full analysis can be found within **Appendix 3**.

The re-use of the site for housing could therefore provide greater certainty in meeting housing targets outlined by SESPlan, the current and indeed the forthcoming LDP2. Taking all the matters into consideration we would recommend the following modifications prior to the adoption of LDP2.

Local Development Plan 2, Proposed Plan, Caerlee Mill Extract

The proposed LDP2 has the subject site allocated for mixed use and as set out within the extract below. The section to follow will then go onto provide related context and put forward recommendations for a limited modification to the allocation.

MIXED USE

MINNE001	Caerlee Mill	1.5	35
Site Requirements			
<ul style="list-style-type: none"> • A planning brief has been undertaken for the site • The site must provide a mix of uses including housing, employment and/or commercial • A Flood Risk Assessment may be required. No building should take place over any existing drain/lade that is to remain active. Where watercourses may be culverted through the site, opportunity should be taken to de-culvert • A water impact assessment will be required • The main vehicular access into the site will be via Chapel Street. Maxwell Street is currently not adopted and whilst a vehicular link with Maxwell Street is desirable it will require the entire length of Maxwell Street to be upgraded to an adoptable standard • A Transport Statement will be required • Provision of amenity access within the development for pedestrians and cyclists. Links to the footpath network to be created and amenity maintained and enhanced • Further assessment of archaeological interest will be required and mitigation put in place • Assessment of ecology impacts and provision of mitigation, as appropriate • The site is located within the Innerleithen Conservation Area, and the category 'B' listed Brodie's Mill is also located on the site. As a result any new development on the site must incorporate the conversion and retention of the listed building and enhance its setting. The development must also incorporate the retention of the stone boundary walls • In advance of the development being occupied, connection of waste water (foul) drainage to the public sewer will be required • Potential contamination on the site should be investigated and mitigated. 			

The requested amendment set out below focuses on three areas of the current allocation. Primarily the denoted residential unit density of the site and the wording of bullet point two and ten.

Proposed Recommendation and Modifications

Recommendation:			
<p>That the Caerlee Mill site, given its scale and brownfield status, should be increased from the denoted 30 units within allocation MINNE001 to 76 residential units.</p> <p>Whiteburn believe that in addition to the 44 units already granted the site is more than capable of accommodating a further 21 flats in / or instead of Brodies Mill and 11 houses in the grounds, which then would increase the subject sites housing density by a further 32 units.</p> <p>We kindly request that the subject sites housing allocation be increased from the stated 35 units to 76 units.</p> <p>That the Caerlee Mill allocation bullet point two and ten be modified as below.</p>			
Proposed Modification:			
<i>Innerleithen Settlement Profile - Housing Table</i>			
To include Caerlee Mill site within the Innerleithen Settlement Profile as follows:			
Housing			
Site Reference	Site Name	Site Size (ha)	Indicative Site Capacity
	Caerlee Mill	1.5	76
Site Requirements			
<ul style="list-style-type: none"> Refer to approved Planning Brief 			
<i>Innerleithen Settlement Profile - Settlement Map</i>			
Include Caerlee Mill site in the Settlement Map for housing-led regeneration. This will include the continued consideration of other suitable uses within the listed buildings but would not prohibit the re-use/redevelopment for residential purposes.			
<i>MINN001 Wording</i>			
Bullet Two			
It is sought that bullet point 2 of the site allocation wording be change to:			
<i>The site is considered suitable for housing. Employment/commercial uses would also be deemed acceptable subject to it not having any significant residential amenity impact on neighbouring houses.</i>			

Bullet Ten

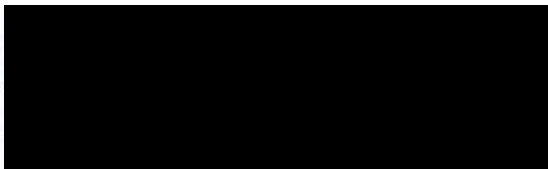

The site is located within the Innerleithen Conservation Area and the Category 'B' Listed Brodie's Mill is located on the site. As a result, any new development on the site should consider that context and not have any significant impact. It is expected that the listed buildings that remain on site would be converted. However, if evidence is presented and accepted that every effort has been made to reuse the building unsuccessfully then alternative use and/or demolition maybe considered and in line with Historic Environment Scotland guidance

Conclusion

Whiteburn are keen to bring the entire Mill site back into use. Given the significant level of momentum and concerns surrounding the state and impact of the longstanding vacant Mill buildings, it is considered appropriate for this to be fully recognised in the Proposed Plan and the site to be formally allocated as per our recommendations / modifications.

Should you require any further information or wish to discuss this representation in greater detail, please do not hesitate to contact Tim Ferguson.

Yours Sincerely

FERGUSON PLANNING

APPENDIX 3

Analysis of Housing Land Supply in the Scottish Borders 2009-2026.

Description		Figure	Calculation
Scottish Borders Housing Land Requirement (2009-2024) ¹	(a)	12,930	
Length of period (years)	(b)	15	
Annual housing requirement	(c)	862	(a)/(b)
Annual housing requirement (2009-2019) ²	(d)	965	9,650/10
All tenure completion 2009-2019 ³	(e)	3,959	
Completed years	(f)	10	
Remaining residential requirement	(g)	8,971	(a)-(e)
Years remaining ⁴	(h)	5	
Revised Annual housing requirement	(i)	1,794	(g)/(h)
5 year requirement	(j)	8,971	(i) x 5
SBC-claimed effective supply	(k)	3,679	
Audited effective supply ⁵	(l)	2,351	
SBC-claimed number of years supply	(m)	0.41	(k)/(j)
Audited number of years supply	(n)	0.26	(l)/(j)
Audited housing shortfall	(o)	6,620	(j)-(l)

Policy 5 of SESPlan 2013 establishes the housing supply targets for the Edinburgh and South East Scotland City Region. The supporting information and supplementary guidance to the Policy establish supply targets for each local authority area, including the Borders.

Over the period 2009-19, 9,650 new dwellings should have been completed in the Borders. However, the number of units delivered during that period totals 3,959. While it is accepted that excluding sites which the Planning Authority has pursued development of, from the suite of sites proposed for housing allocation would be counterproductive; it is clear that more needs to be done to maintain an effective supply of land for housing and deliver new homes in the Borders.

Ferguson Planning have presented a suite of sites in this consultation which are well related to existing settlements, arterial transport routes, and utilities infrastructure. It is considered that sustainable development of these sites can deliver much needed new homes and assist in redressing under delivery of housing in the period 2009-19.
