Dear Sir/ Madam,

I hope you are well.

Please find attached the representation for the site at Earlston Road, Stow, Galashiels in response to the Local Development Plan 2 Consultations.

If you have any questions with regards to the attached, please do not hesitate to get in touch.

Best wishes,

[REDACTED]

## **Representations to Local Development Plan 2 (Period 2021-2026)- Proposed Plan Consultation**

**Mr. Bruce Weir-** [REDACTED]

Dear Sir/ Madam,

### **Introduction**

We write on behalf of Bruce Weir and in relation to the above consultation. This representation relates to his site to the west of Earlston Road, Stow and is accompanied by a location plan (as shown in the Appendix 1). The site has a potential capacity for up to four dwellings and can help to assist with the housing requirements within the next local development plan period. The site is situated to the south of the settlement boundary of Stow, 0.6 miles south east of Stow Train Station which provides direct hourly ScotRail services to Edinburgh City Centre and Tweedbank.

We note the settlement boundary within the proposed Local Development Plan does not extend around the site in question. The site is considered to represent an ideal location for the extension to the settlement boundary. This representation follows on from the call for sites representation we made for the sites in August 2017.

An application has recently been made on the site for four residential dwellings which is awaiting determination (LPA ref: 20/01620/PPP).

The provision for four additional homes on this site represents the most suitable and sustainable form of development as the proposal will contribute to the vitality and viability of Stow's local services and school and aligns itself with the vision expressed within the Borders Railway Blueprint that seeks to maximize growth along the new Borders Railway Line.

### **Site Location**

The site is currently rough pasture and bordered and contained to the east by mature trees, adjoining Earlston Road. To the north are residential dwellings and associated gardens. To the south and west are agricultural fields laid to grass. Beyond the south

west corner of the site is an agricultural building and associated yard.

The site can currently be accessed from a track to the south, off Earlston Road. The boundary treatment is timber post-and-wire fencing with short stretches of dry-stone wall and woodland. In terms of topography, the site occupies the southern banks of the valley where Stow lies, and as such rises relatively steadily from north to south.

With regards to the Local Development Plan adopted proposals map, the site holds no specific allocations or designations and directly abuts the current settlement boundary.

In terms of accessibility, the site is well served by the existing public transport with the local bus stop and train station within walking distance and which provides frequent services between Galashiels and Edinburgh City Centre.

In terms of Heritage, there are no listed buildings on or within close proximity to the Site. The Stow Conservation Area is to the north east of the site. The site does not fall within an area at risk of flooding.

### Main Issues Report Consultation Response September 2020

The Main Issues Report Consultation Response was published in September 2020. Following the promoting the site within the call for sites consultation 2017 (Ref: ASTOW029), it was considered by the LPA that the Site would not be allocated within the Proposed Local Plan. The full response can be found below:

*“Following a full site assessment it is considered that site ASTOW029 is not appropriate for allocation. The site forms an important part of the setting of the settlement, and is constrained within the Development and Landscape Capacity Study. In addition, development at this location would result in extending higher into the hill than all other development. The Roads Planning section have raised concerns and are only able to support a minimum amount of development. Anything over 4 units will require the road to be brought up to an adoptable standard and it is not envisaged that this could be achieved. This is likely to include the provision of a possible new bridge over the Crunzie Burn and the access route via Earlston Road is narrow will a considerable level of on street parking and is not suitable to serve more houses. It should be noted that developments of less than 5 units will not be allocated within the Local Development Plan (LDP).”*

*However, it should be noted that in relation to roads standards regarding private accesses, the Proposed Local Development Plan will state that: “A private access can serve a maximum of 5 dwelling units. ...” Therefore, it may be that the site could be reconsidered in the future. However, as the site was not included within the Main Issues Report, the site cannot be taken forward at this time.*

*As a result of the above, it is considered inappropriate to identify site ASTOW029 within the Proposed LDP.”*

## Opportunity

The site represents a natural extension to the Stow development boundary and where other opportunities within the settlement are extremely limited. Following the introduction of the Borders Railway Stow has become a sought after location to live. It is important that land allocations are made in sustainable and sought after locations. The site is within a 10 min walk from the train station and the regular bus services on the A7 and thus represents a sustainable location.

We note within the Main Issues Report Consultation Response it is noted the site forms an important part of the setting of the settlement and is constrained within the Development and Landscape Capacity Study. We do however believe the site does form part of the setting of the settlement and a landscape appraisal has been submitted with the registered planning application to demonstrate this. We therefore deem that a development of four dwellings fits well within its surroundings and is justifiable.

It is noted concern was raised with regards to Roads Planning. The current planning application has submitted a Traffic Statement to support the proposals on the site to respond to the concerns raised. Through consultation with the roads officers it has been agreed that less than five units would be acceptable and that the road within the site will be a private road.

Policy HD2 of the LDP promotes appropriate rural housing development associated with existing building groups subject to not adversely affecting the character of the site or surrounding area. The policy states housing of up to 2 or a 30% increase associated with the existing building group may be approved if it is a logical extension to the built form.

We consider a defined settlement such as Stow should equally be regarded as a large rural building group and one which is served by local services and public transport. The subject site adjoins the settlement boundary of Stow and is therefore thought to be a logical extension for housing development.

As the proposed extension is for less than five units, it is deemed to be below the threshold for consideration by the Local Development Plan. The logic of which we do not agree with when considering suitable residential extensions to existing settlements within the Borders.

Stow as a large rural grouping or settlement should, in theory, allow the four well placed dwellings given it would fall within the 30% ruling of an existing building group. It is further supported by the fact that it is highly accessible by modes other than the private car.

An application has recently been made on the site for four residential dwellings which is awaiting determination (LPA ref: 20/01620/PPP). The proposal provides a new pedestrian link which joins the existing road from Cruzion Cottage to Earlston Road to the north of the site, providing access to and from Stow Train Station, as well as the local services and amenities which are all within a ten-minute walk from the site. The bus stop for the X95 service is within five- minute walk from the site providing frequent services to Hawick, Carlisle, and Edinburgh City Centre. As a result, new and existing residents

will be less reliant on the car, encouraging active travel and representing a sustainable development.

It is considered Stow should be a focus for future housing growth due to its sustainable location with easy connectivity to the wider area, further supported by the Borders Railway: A Blueprint for the Future which seeks to ensure there is a generous supply of housing land to cater for the increase in people and families living in the Scottish Borders.

Both the current SBC Local Development Plan and that of the proposed LDP allocates three relatively small sites within Stow for housing development which are set out below and all of which are considered to be constrained.

LDP 2016 Site Allocations- Stow			
Site	Reference	Allocation	Constraints
Craigend Road	ASTOW022	10 units	<ul style="list-style-type: none"> <li>• Landscape Impact</li> <li>• Transport Concerns</li> <li>• Flood Risk</li> <li>• Core Path retention</li> </ul>
Stagehall II	ASTOW027	12 units	<ul style="list-style-type: none"> <li>• Flooding concerns- Surface water run off form the surrounding area to be considered</li> <li>• Landscape Impact</li> <li>• Access concerns</li> <li>• Requirement for the provision of amenity access may affect viability.</li> </ul>
Royal Hotel	MSTOW001	11	<ul style="list-style-type: none"> <li>• Planning Brief</li> <li>• Flood Risk</li> </ul>

The above sites have not been delivered within this plan period despite contributing to the housing land supply. The sites have, however, been reallocated in the proposed LDP 2. This would suggest current housing needs are not being met within Stow and the need for further provision beyond that allocated. The subject site represents a logical and sustainable windfall opportunity to help address current shortfall.

Over reliance on only allocating three sites within both the adopted and proposed LDP is considered unusual, particularly given its location on a trunk road and provision of Stow Train Station. When one considers some of the other sites being mooted by the proposed LDP it is clear to us that many have not and will not be fully delivered upon within the assigned time period leading to a shortfall in the housing land supply.

Although the Housing Land Audit (April 2020) identifies a Housing Land Supply, it is evident that many allocated sites are yet to come forward for development and dating as far back as 2016. This then leading to the housing land supply not being fully built out and posing significant questions on the deliverability of the allocated sites within both

the existing and proposed Local Development Plan.

This again becomes clear within the 'Scottish Borders Housing Land Supply' summary page which shows that no site within Stow is set to come forward until 2023 this is despite of them being allocated in the current LDP and thus should have been developed out in full by now.

The subject site is free from constraint and which is owned and would be built by the applicant. It can easily assist in making up the identified housing shortfall. Given the distance, boundary screening that will come forward with a proposed development and scale of development the subject site is considered to have no adverse impact on the setting of the Stow Conservation Area to north east of the site.

### Proposed Recommendations and Modifications

<b>Recommendation:</b>			
<b>That the Earlston Road site, given its sustainable location is included within the settlement boundary for Stow and allocation for up to 4 residential dwellings.</b>			
We believe on behalf of Mr. B Weir that the site represents a natural and sustainable location for the settlement boundary extension within Stow and a logical location for residential development.			
We kindly request that the subject site is included within the settlement boundary for Stow and is allocated for residential development for up to 4 dwellings.			
<b>Proposed Modification:</b>			
<b>Stow Settlement Profile - Housing Table</b>			
To include Earlston Road site within the Stow Settlement Boundary and allocated for residential development as follows:			
<b>Housing</b>			
Site Reference	Site Name	Site Size (ha)	Indicative Site Capacity
	Earlston Road, Stow	1.1	4
<b>Stow Settlement Profile - Settlement Map</b>			
Include Earlston Road in the Settlement Map for housing development as per below:			

## Conclusion

We believe that this site should be allocated within the settlement boundary for up to Four residential dwellings within the Local Development Plan 2021-2026. The site is deliverable in full within the Local Plan lifespan.

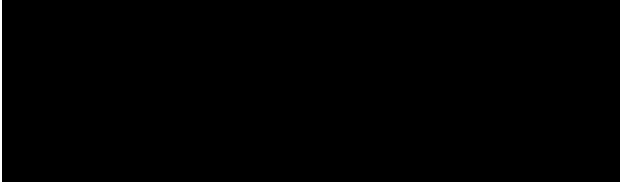

It is considered the site represents a natural extension to the settlement boundary. Due to its proximity to the current built form, there will be easy access to utilities and existing infrastructure.

We stress the importance of allocating housing in the Scottish Borders where there is a strong demand to live. Due to the Borders Railway there is now strong demand to live in Stow and thus we hope that this site is allocated as part of the forthcoming LDP 2.

If you have any queries regarding the enclosed documents, please do not hesitate to contact myself [REDACTED]

Yours Sincerely
