Re: AGALA029 Netherbarns.

Dear Planners,

We want to register our very strong objection to the proposed development of the Netherbarns site.

We think the usual impact of this development would ruin the view from across the river, which is currently a very special part of the experience for thousands of visitors to Abbotsford.

The recently re-opened paths at Abbotsford are used all year round by local walkers, valued for their
are

tranquillity and historic significance, both of which would be marred by sounds and lights from the proposed development, as well as by the visual impact.

We do not believe that planting a thin screen of trees would adequately hide the 45 houses and we think Scott's beloved landscape is a unique heritage which should be preserved for future generations, not something we should allow to be lost forever on his 250th anniversary.
