To Whom it may Concern,

I am writing to express my concern regarding Scottish Borders Council's plans for site code RC2B.

This site has 3 individual water supplies to my properties. There are 2 x 25mm blue pipes from the east of Scotland's main water valves travelling in a southerly direction. The other supply is a black pipe travelling in a northerly direction from a valve in the back garden of a house in Chesters Brea. This pipe connects to 2 cattle sheds and 1 field trough.

There are at least 2 further water pipes over this site which do not concern myself.

I would be very grateful if you can insure that my supply is not effected by any development.

I look forward to hearing from you in due course.
