

SECTION

Plant pot grown shrubs at sufficient density to provide full coverage (average 3 plants per sq metre for 2-3L pot size, up to 7 plants per square metre for smaller groundcover shrubs in 0.5L pots)

Cultivate shrub bed to minimum depth of 200mm using suitable topsoil/ planting compost.

Ensure to plant at correct depth i.e. top of soil pot level at finished shrub bed level.

Provide suitable edging.

Minimum 75mm bark mulch.

Ensure adequate drainage to sub base.
