Subject: Glentress cottage

I find it difficult to believe that the borders council is considering putting in an industrial development in a field beside the beautiful glentress cottage. The view from the sunroom is amazing and to spoil that is such a shame. It's not only the view though. As a previous rental guest of the cottage I think the peace and tranquillity as well as the beauty of the place will be totally spoilt. We have been considering going back there again as we absolutely loved it but we certainly don't want to be holidaying next to an industrial estate. No one I know would want to either. would think you would want to treasure the beautiful tweed valley and keep it as somewhere where you know people will come on holiday again and again.
