Subject: LPDD2 objection

To whom it may concern

I wish to make a really strong objection to any new or forthcoming plans or suggestions or proposals for planning or building permits or permissions to be granted consented or given for the construction or development of any construction in or near Glentross or Eshiels.

As a local resident who moved out of Edinburgh to live in a rural setting that is famous throughout the world I do not give my consent to or approval for houses or communities to be built on my doorstep. Is it not enough that the forestry commission were recently granted developmental approval on a big scale in this area.

Please keep me updated on any proposals, planning meetings or approvals.

Many thanks
