Question 12**Develp contrib town:**

no comment

Delivering sustainability and climate change agenda**Question 13**

Support alternative option:

Southdean CC supports delivering sustainable solutions which help address climate change. However the CC feels that the current policies are too narrow in focus and have the potential to damage our local area. The proliferation of wind farm applications has been felt in this area, and the height of the turbines proposed continue to increase. The potential size of the applications would transform the local area in a negative manner. Scottish Borders Council must ensure that any proposals are weighed with local community views considered.

Question 14**National park:**

Yes ..This is supported by Southdean CC . The designation of a National Park would give reasons for people to come to the Scottish Borders. With improved connectivity there is a fear that direction of travel would be away from the Borders. A National Park would bring a sense of focus and allow local tourism businesses to thrive . Southdean CC would support the area proposed in the study which is effectively Roxburghshire , with a number of the major towns being Gateways. Southdean CC would be included within the broader scheme suggested, and we support the broader area suggested.
