**Question 12****Develp contrib town:**

No

**Delivering sustainability and climate change agenda****Question 13****Support alternative option:**

Given the cost of flood prevention and the suitability of the Scottish Borders to support alternative energy, it would be helpful for communities who resist alternative energy development to understand that such developments can potentially be used actively to offset cost of flood prevention. The council should promote a connection between the two.

**Question 14**

**National park:**

Selkirk and its surrounding area offers many opportunities to support National Park status.

**Settlement Map****Question 16****Oxnam settlement:**

No

**Question 17****Core frontage Newcastleton:**

Yes

**Planning policy issues****Question 18****Agree amendments appendix3:**

I think we should actively promote any housing development and that the three house option severely limits this. The alternative option is a more realistic way of encouraging individuals who wish to build sensitively in more remote areas.

**Any other comments****Question 19****Other main issues:**

In terms of balance I feel there is an overcommitment to the west of this authority where provision is already very well established e.g. Peebles and Innerleithen. The eastern side of the Borders needs more investment and attention and the plan is very unbalanced in that respect.
