Table 4.17: How often people have felt lonely within the last week by long-term physical or mental health condition

Column percentages, Adults

This biennial question was first and last asked in 2018

Scottish Borders, 2019

There is no data to show for this table within the specified parameters.

Scotland, 2019

There is no data to show for this table within the specified parameters, or there is no data to compare with.

Table 4.18: How often people have felt lonely within the last week by household type

Column percentages, Adults

This biennial question was first and last asked in 2018. It should be noted that the definition of a single parent does not make any distinction between situations where a child has regular contact and/or partly resides with their other parent and a child who solely resides with and is cared for by one parent

Scottish Borders, 2019

There is no data to show for this table within the specified parameters.

Scotland, 2019

There is no data to show for this table within the specified parameters, or there is no data to compare with.

Table 4.19: Percentage of people saying a problem is very/fairly common in their neighbourhood

Column percentages, Adults

Questions on 'Animal nuisance' and 'Abandoned/Burned out vehicles' were not asked until 2009. Columns may not add to 100% since multiple responses were allowed. Another Scottish Government population survey, the Scottish Crime and Justice Survey (SCJS), also collects information on perceptions of a range of neighbourhood issues, including feeling of safety, how common specific crimes are believed to be in the local area, alongside respondents' views on neighbourhood cohesion and community support. As questions are asked in a different survey context, any similar measures should not be directly compared to SHS findings
