

Safe Hub User Guide

Getting Started

Open the **Safe Hub** app.

You will be asked to enter:

- Server Code
- Mobile Number
- 3 Digit PIN

These will be in your **Welcome Email**.

Network data or a Wi-Fi connection is also required for setup.

Alerts

Red Alert makes a call to an emergency operator. Used to provide support if you feel threatened.

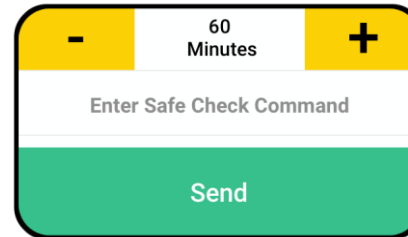

Yellow Alert records a voice message on Safe Hub.

Safe Check

Welfare check module that requests a response every hour.

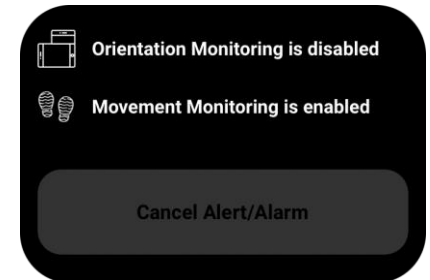

When this reaches zero, enter your Safe Check code “**ok**” to reset the timer.

Enter “**help**” at any time to request help.

Worker Down

Activates movement and orientation monitoring.

Raises an alarm if no movement is detected within a set period of time.

If the alarm is not cancelled an operator will attempt to contact you.

For more information about the Safe Hub app go to the **Knowledge Hub** linked in your **Welcome Email** or under the **More** tab in the app!
